Re: letter of recommendation for Marc Gabriel

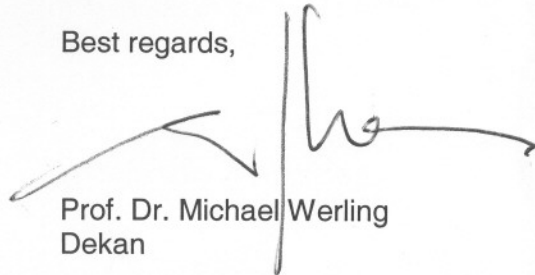

Dear Colleagues,

I would very much like to recommend Mr. Marc Gabriel for a place in your school for a Master of Project Management (MPM).

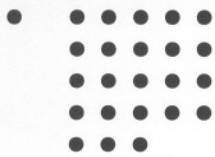

Marc started his studies at the Faculty of Economics Architecture in September 1999. In March 2001 he became student assistant or at the Institute for Technology and Ecology under Prof. Willbold-Lohr. Since March 2003, until July 2003, he worked for Dr. Doris Haas-Arndt. He was member of the faculty gremium since 2002 where he was in charge of the position of the student representative.

I would describe him as open-minded, enthusiastically and motivated student. Attached to this mail you can find two letters of recommendation, which Prof. Dr.-Ing. M. Koopmann and Dr.-Ing. D. Haas-Arndt wrote for him.

Best regards,

Prof. Dr. Michael Werling
Dekan

Köln, 20. July 2004

TO WHOM IT CONCERNS,

It gives me immense pleasure in recommending Marc Gabriel for a place in your school for a MA in Integration of Renewable Energy in Buildings. I have known him for three years in my capacity as substitute Professor of daylight technology, sustainable building design and supporting structures at the faculty of Technology and Ecology.

Marc was my Assistant Student since I started in my position at the university of applied science in Cologne. He was characterised by his above average interest in the sustainable building design, high personal commitment and organizational ability.

I have also taught him two theory courses, 'Daylight Technology' and 'Building under respect of natural resources'. In this context, I wish to place on record the consistently outstanding academic performance of Marc Gabriel during his studies. As per his performance records, his work can be placed in the top 10% of students in my subject. He is intelligent, inquisitive and yearns to gain an in-depth knowledge. With his determination and ability to connect theory to real life I have no doubt that he will succeed in all his endeavors.

In my view Mr. Gabriel compares favorably with the best among my students and I recommend him in the strongest terms for the position in your college.

Dr.-Ing. Architektin Doris Haas-Arndt
